

RANGE SERVANT

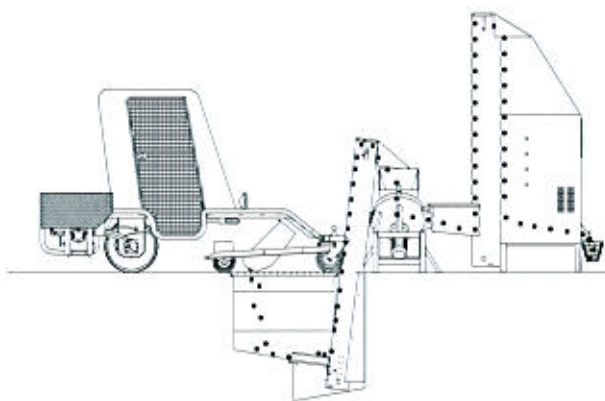

- THE RIGHT PARTNER FOR YOU -

Driving Range Equipment

Ball Management System

The Ball Management System is the cornerstone of Range Servant. By combining the picking, washing and dispensing into one system, we have helped hundreds of ranges world wide to run an efficient, safe and cost-effective driving range.

Range Servant systems come in standard configurations or can be customized to meet the needs of any driving range. Our systems are designed specifically to reduce labour cost and the time it takes to process your ball inventory so you can concentrate your energy on revenue sources, like the pro-shop.

Range Servant has Ball Management Systems for all driving ranges from the country club to multi-storey ranges.

The Range Servant equipment combines reliability, flexibility, accountability and good economy into one complete system – the Ball Management System!

Ball Management System

Range Servant has Ball Management Systems for all driving ranges from the country club to multi-storey ranges. We can help you make your driving range more efficient by providing a ball management system that fits your facility's layout and business volume. Range Servant has a solution for you – whether you need to wash and transport balls 250 meters or lift the balls to the fifth floor.

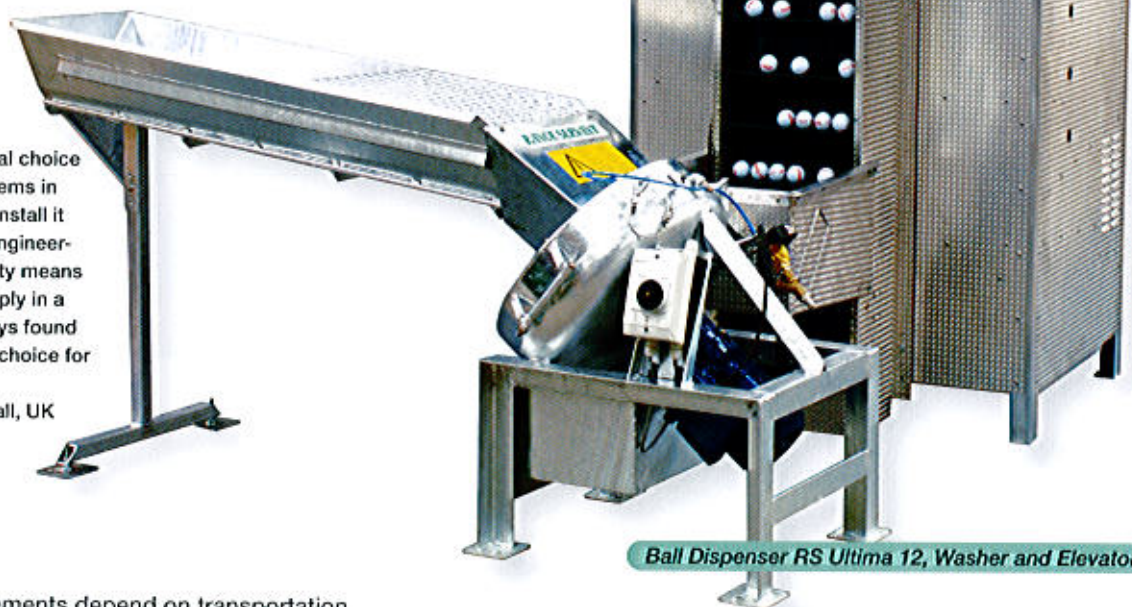

Blower Systems

The Range Servant blower system enables you to isolate the washing area and transport the balls to multiple dispensers, in a quick and efficient way. The blower system is available in two standard designs with manual start for filling one or two ball dispensers from a ball washer. The system automatically shuts off when the ball dispensers are full. A low level control for automatic filling can be added. (A ball hopper is then required).

SANDBURN HALL

"Range Servant is the ideal choice for ball management systems in driving ranges – you just install it and forget about it. The engineering, reliability and durability means that Range Servant is simply in a class of its own. I've always found them to be the Number 1 choice for range equipment."

Sean Clarke, Sandburn Hall, UK

Ball Dispenser RS Ultima 12, Washer and Elevator

Blower module requirements depend on transportation distance and/or height.

Blower module	Height (m)	Distance (m)
1.5 kW	4	25
2.2 kW	8	70
3.0 kW	10	100

Ball Management System 1 - Filling one dispenser

This system is for filling one ball dispenser from a washer. It consists of a blower module, ball receiver and control system. You can add on a module if you want to fill the dispenser from a ball hopper. This can be done manually or automatically – when the dispenser reaches a low level it is automatically filled. The hopper system consists of a hopper dispensing mechanism and a low level system for the dispenser.

BMS 1 - Filling one dispenser

BAM 0135	BMS 1 with blower module 2.2 kW
BAM 0136	BMS 1 with blower module 3.0 kW
BAM 0137	Hopper system 1

RS Blower

Ball Management System 2 - Filling two dispensers

This is the system for filling two ball dispensers from a ball washer. The filling is automatically shut-off when the ball dispensers are full. These packages consists of a blower module, ball receivers, manifold and control system. Ball hose to transport balls, ball washer and ball dispensers are ordered separately. A system to fill the dispensers from a hopper can be added. Filling then starts automatically when the ball dispensers reaches a low level. This system consists of a hopper dispensing mechanism and low level systems for the dispensers.

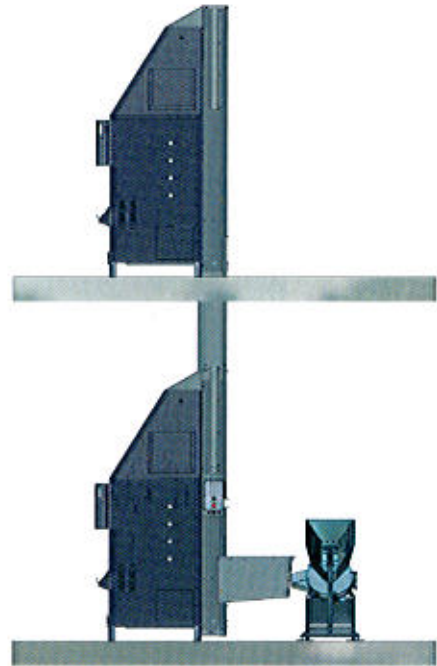

BMS 2 - Filling two dispensers

BAM 0138	BMS 2 with blower module 1.5 kW
BAM 0139	BMS 2 with blower module 2.2 kW

Elevators and conveyor systems

Range Servant designs custom made elevators to suit the customers need from the standard 1.4 meter elevator to the 12 meter multi-storey elevators.

Hongkong Island Golf Club, photo: Richard Castka/Sportpixgolf.com

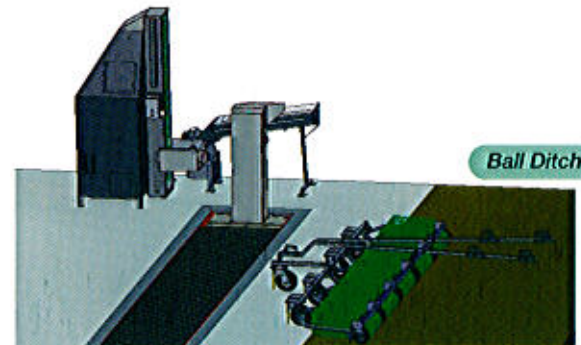

In 2005 a new 4-storey driving range opened in the middle of Hongkong. Range Servant supplied and installed all the driving range equipment – four ball dispensers, a storage hopper, ball washer and a custom made 12-meter elevator to distribute the balls to each floor.

Ball Management System

Ball Management System 3 - Ball Ditch

Using the Range Servant drive-unit and a ball picker with a hydraulic emptying system on the range is a very effective way to reduce labour time and broken backs. While seated in the drive-unit, push a button and the balls are dropped into a water filled ditch which also works as a pre-soak for those muddy ranges. The balls are lifted up from the ditch by a ditch elevator, feeding the balls into the washer. From the washer the balls are then carried by an elevator into a hopper or a dispenser. The system has an automatic shut-off feature.

Ball Ditch

MOP

Range Servant offers an easy-to-operate Motorized Unit, "the MOP", specifically designed to pick up balls at a golf driving range. Since the MOP unit rests on one steering wheel, it boasts a very tight turning radius. Due to its relatively low weight, it is easy on the turf it picks from. With its strong nylon mesh cover, and steel net doors on both sides, it is safe for the operator to use the ball picker even while the range is in use.

Motorized Unit Engine Model Operating Speed

500 020 Kohler 15 hp 10-12 km/h

Ball picker HD with manual or hydraulic emptying

PBA 0001	Midi	Multiflex with manual emptying
PBA 0002	Maxi	Multiflex with manual emptying
PBA 0003	Midi	Multiflex with hydraulic emptying
PBA 0004	Maxi	Multiflex with hydraulic emptying

Motorized Unit with Ball Picker Maxi Multiflex

Hydraulic emptying

The MOP is designed to push all Range Servant HD Picker models.

Ball Hoppers

You can add a hopper to your existing ball dispenser for additional capacity. Hoppers are used in systems to store clean golf balls before they are distributed to the ball dispensers and Tee-Up machines. The Range Servant hopper is available in five standard sizes from 4 000 to 50 000 balls.

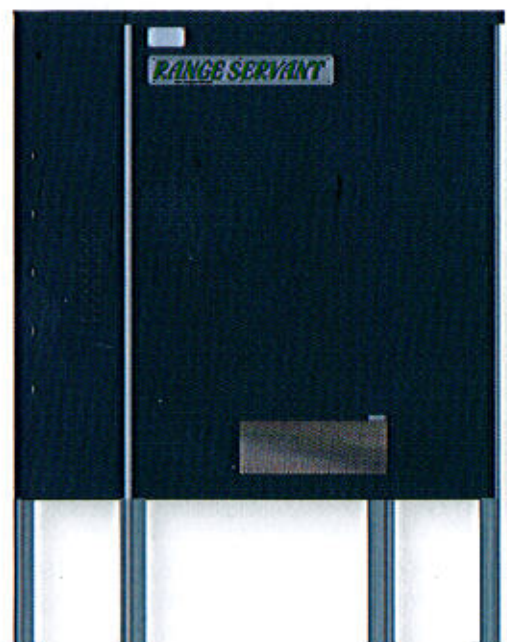

Hoppers

970 065	Hopper 4	~ 4 000 balls
740 000	Hopper 11	~ 11 000 balls
750 000	Hopper 15	~ 15 000 balls
780 000	Hopper 30	~ 30 000 balls
790 000	Hopper 50	~ 50 000 balls

Hopper elevators

410 000	Hopper Elevator 1.8 m (for H-4, H-11)
420 000	Hopper Elevator 2.3 m (for H-15, H-30, H-50)

For more custom specific requirements please contact Range Servant.

RS Ball Dispenser Flat Top Models

RS-4, RS-8, RS-11

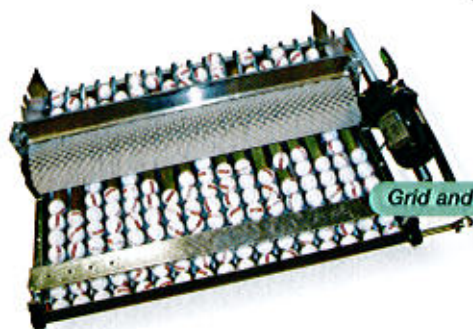

The flagship product of Range Servant is the original RS Ball Dispenser, which has proven to be the most reliable and durable on the market. The grid and cradle system, introduced in 1983, consistently delivers an exact amount of clean, counted and undamaged balls to the customer.

- 3 bucket sizes available
- Exact ball count per dispense
- Tokens, cash, cards, keys
- Stainless aluminium, galvanized
- Easy and safe to load

Since all Range Servant dispensers are modular by design, they can be expanded and upgraded to larger models or into cone top models, to meet the needs of a growing driving range. For example, an RS-8 can be expanded to an RS-12!

RS-8

Grid and cradle system

Strongly made and simple to maintain, all essential working parts are made in rust resistant galvanized steel and aluminium. An ingenious "grid and cradle" design sorts out damaged balls and other unwanted objects ensuring that the golfer only receives clean and undamaged balls.

RS: Flat Top

150 010	RS-4	with internal wash	~ 5 200 balls	1010x550x1476 mm
180 000	RS-8	with internal wash	~ 8 000 balls	1010x760x1476 mm
110 007	RS-11	with internal wash	~ 11 000 balls	1250x1010x1476 mm

Ultima Ball Dispenser Flat Top Models

Ultima 8, Ultima 15, Ultima 16 Dual

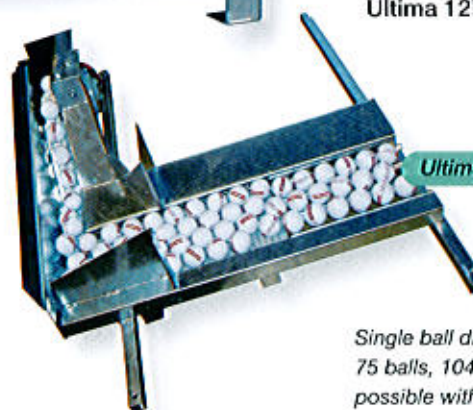

Featuring a "single ball" dispensing mechanism that counts the balls individually, you can count on the Ultima to dispense the right amount of balls every time! Combine this with superior electronic controls and the widest selection of payment methods around and you have the most flexible and reliable ball dispenser available today.

- 3 bucket sizes of any ball count
- Ball count changes easily made
- Photo-sensor counts each ball
- Tokens, cash, cards and keys
- Stainless galvanized aluminium
- Easy and safe to load

All Range Servant Flat Top machines can be loaded from the front or back. Ball counts can be changed at any time by simply turning a dial. Since our ball dispensers are modular, they can be expanded and upgraded to larger models, or into con top models to meet the need of a growing driving range. For example, an Ultima 8 can be expanded to an Ultima 12!

Range Servant Ball Dispensers will increase ball sales, give you better cash control and reduce labour.

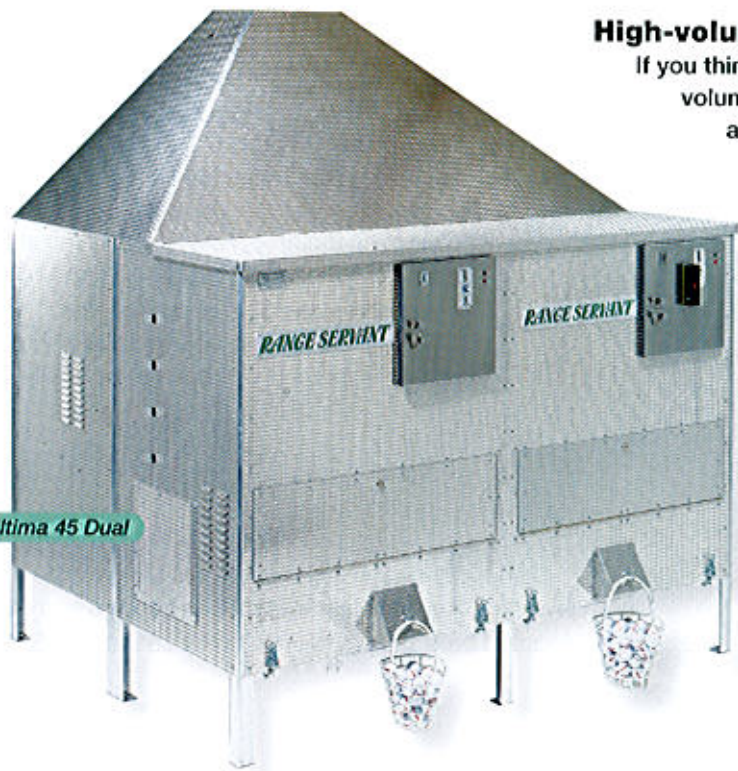

Single ball dispensing: 25 balls, 42 balls, 75 balls, 104 balls... Any ball count is possible with the Ultima dispenser.

Ultima: Flat Top

Ultima Cone Top Models

Ultima 12, Ultima 19, Ultima 20 Dual, Ultima 45 Dual

Ultima 45 Dual

High-volume range?

If you think your range is busy, then look no further! The high volume cone-top models are designed to minimize labour and increase revenue at the same time. These models are extremely versatile and designed to be loaded with any of our renowned automation products.

Whether filled by our elevator or blower, our Ball Management Systems are quiet, cost effective and space efficient.

Cone Top models are available in a single or dual outlet design. With capacities ranging from 12 000 to 43 000 our dispensers can meet the demand of any golf range.

Range Servant dual dispensers have proven their mettle at the busiest ranges in the world. With extra capacity and twice the reliability, our dual outlet dispensers will allow you peace of mind.

Quiet, cost effective and space efficient. Our dual outlet cone top models are available in two sizes: 20 000 and 43 000 ball capacity.

These dispensers should be used as a complete Ball Management System together with elevator/blower and ball washer.

Ultima 12

Ultima Combi and Green Line Dispensers

GL6, GL8 and GL10

Ultima Combi

Ultima Combi

The ALL-IN-ONE Ball Dispenser with internal washer and ball elevator.

The Ultima Combi is space efficient and cost effective. This dispenser holds a capacity of 14 000 balls, which makes it the perfect fit for smaller stand alone or club ranges. The internal ball washer and elevator reduce labour to a single step and it is designed to be easily accessed and maintained.

Just like Range Servant's other user friendly ball dispensers the Ultima Combi gives the paying customer the exact amount golf balls, quickly and quietly. The dispensing cycle is easy on your ball inventory. Any payment system can be used and the amount of balls per payment is easily changed.

Green Line Dispensers

With the same durable and reliable dispensing mechanism, Range Servant also offers the Green Line – a powder-coated aluminium ball dispenser with an attractive green housing.

The Green Line dispensers are designed to fit smaller driving ranges and country clubs with a lower ball demand. With its' green aesthetics it looks right at home on the golf course.

GL 10

Ultima Combi and Green Line

GLD 0002	GL 10	~ 10 000 balls	760x1260x1476 mm

Range Servant Tee-Up

Tee-Up your customers and your ball sales with Range Servant's Tee-Up!

The Tee-Up can be used as a single unit or be a part of a fully automatic filled from a ball management system.

The Range Servant Tee-Up system is easily installed at any existing driving range and the units are also easily moved. The Range Servant Tee-Up makes range usage more efficient by speeding the customers rate of buying and hitting their range balls. The customers do not have to bend over to tee balls up, in other words – do not have to break the grip or stance and can stay focused on the swing.

Enjoy greater profits as the automated Tee-Up speeds up the practice, and allows more customers to hit more balls.

More practice in less time – this product is a win-win for the range owners and for the practicing golfer.

As a single unit the Range Servant Tee-Up uses a small ball hopper or a ball tray that is directly connected to the automatic tee. The ball hopper holds about 150 balls and is filled up manually by the customer. The balls are then piped through automatically to the tee, ready to be hit. When using the Range Servant Tee-Up with a ball tray the balls are manually moved to the tee.

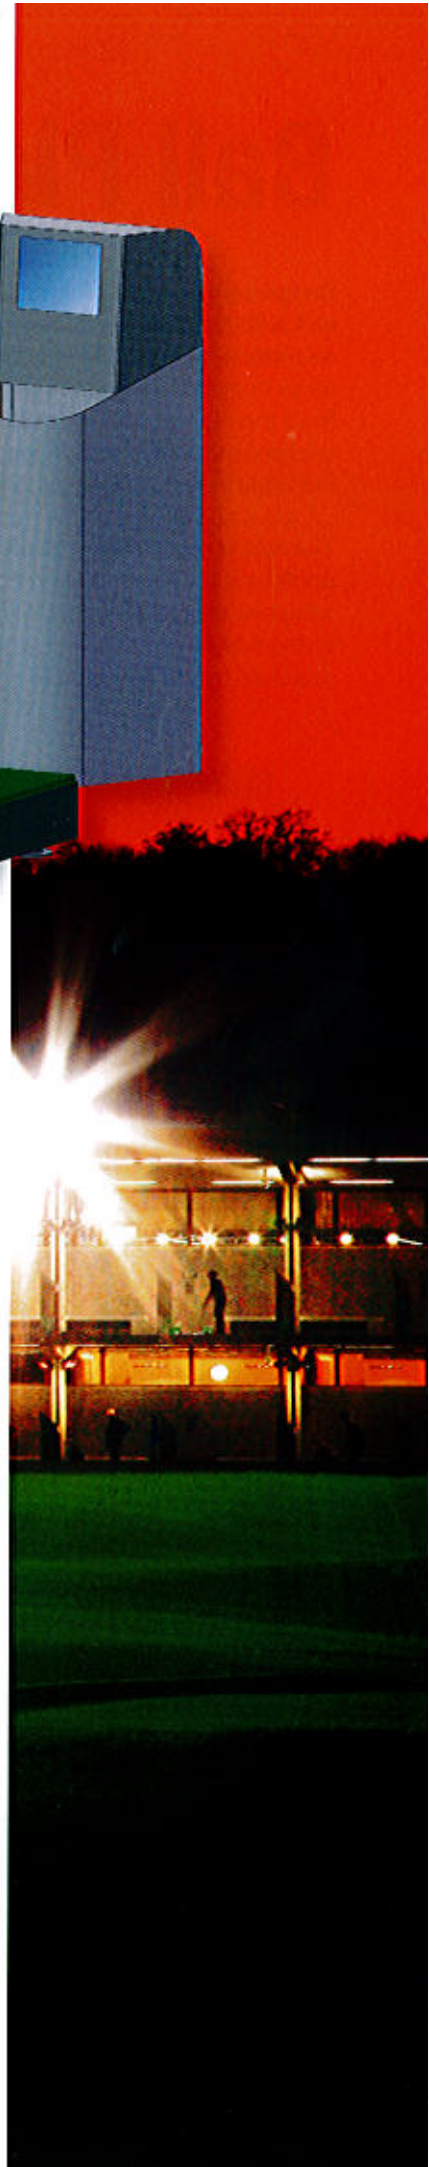

The Tee-Up mechanism is built-in in a galvanized steel base frame with durable stance and hitting mats. The tee height is easily adjusted using the golf club by affecting the height adjustment sensors.

As a part of a fully automatic ball management system the Range Servant is equipped with a payment station, where the payment systems such as token, cash or card system can be fitted. The payment station is equipped with an user friendly operator panel.

- Dispensing capacity 25 balls/min
- Tee height adjustment 0-66 mm

TJM 0080	Tee-Up with payment station		

Ball Picker Light

Range Servant Light pickers are built stronger than any picker in their class. We use only thick gauge aluminium and galvanised steel to ensure that our pickers will stand up to busy ranges and tough terrain. Range Servant pickers have the highest capacities in the market. Our 3 gang pickers hold more than most 5 gang pickers. The Light Picker is available in 2, 3, 4, 5, and 6 gang configurations.

The hybrid design sets the picker gangs in a straight beam configuration. The modified front beam wheel extension, however, reduces the swing weight of the picker when it's attached by our A-Frame to a utility cart.

Both the flat aluminium cross beam and the front beam wheel extension allow for a terrain flexible ride.

- Fully rust-resistant aluminium and steel
- In-line design allows for backing
- Light weight flexible design
- No failure-prone elbow fittings
- Flotation tyres for smooth stable ride
- Multiple flex-points for varied terrain
- Adaptable to any cart or vehicle
- Unique Multiflex discs

Ball Picker Light 3 gang

Ball Picker Light is dedicated to be operated with power driven vehicles. One basket hold 400 balls which gives the Light picker a capacity ranging from 1 600 to 4 800 balls. The A-frame is included.

RS Manual Picker

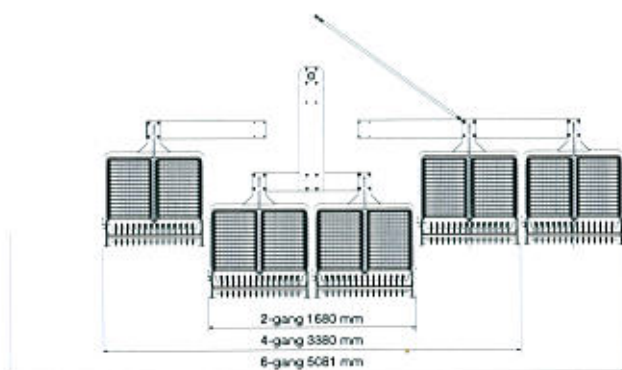

Using the same technology as our larger pickers, the Manual Picker allows for easy and effective picking of smaller practice areas. It can also be used in confined areas when wet conditions make motorized picking unwise.

Multiflex Discs

PDM 0052	2 gang	Multiflex	4 baskets
PDM 0000	3 gang	Multiflex	6 baskets
PDM 0082	4 gang	Multiflex	8 baskets
PDM 0085	5 gang	Multiflex	10 baskets
PDM 0086	6 gang	Multiflex	12 baskets

Plastic Discs

PEM 0001	Manual Picker	Plastic	1 basket
310 035	Manual Picker	Plastic	2 baskets

Ball Picker Heavy Duty

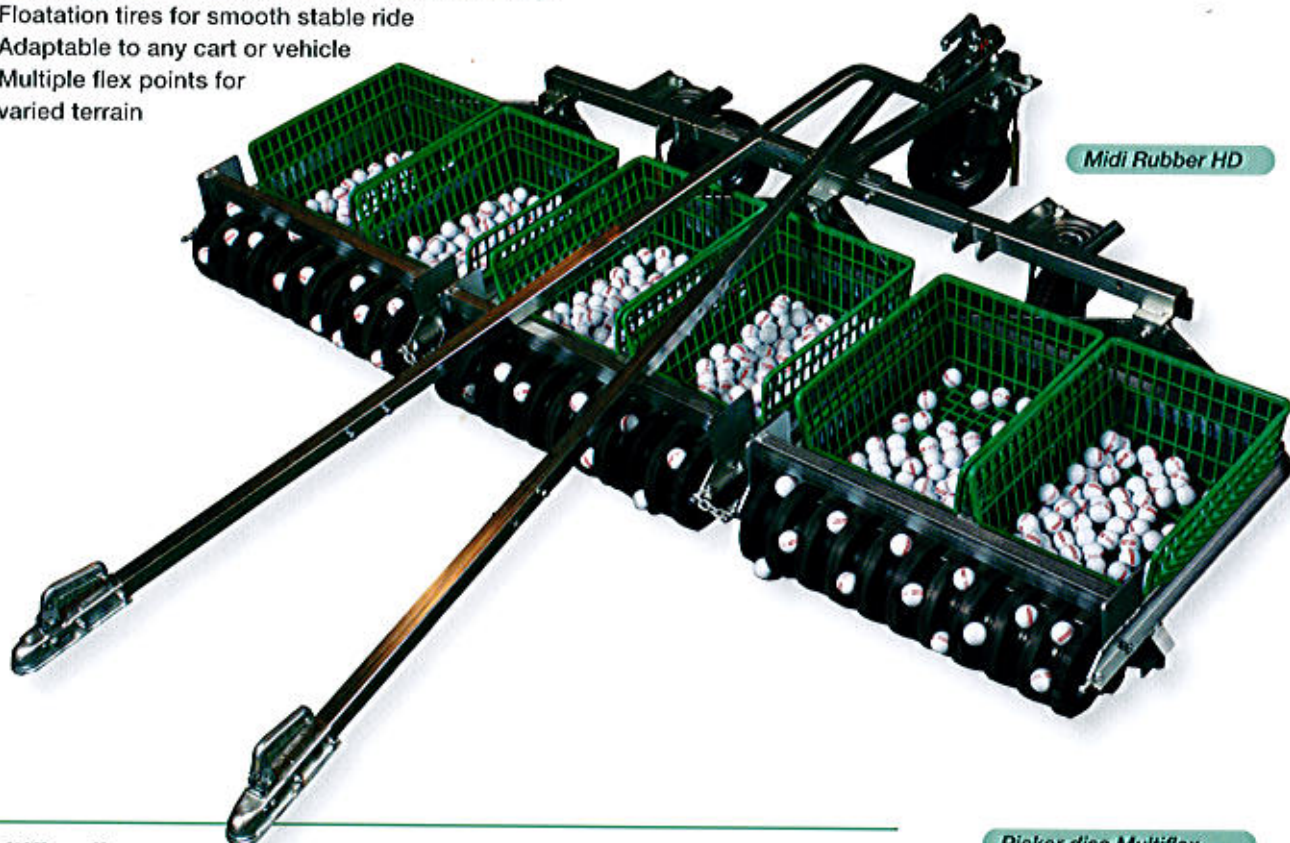

Range Servant Heavy Duty pickers are the only pickers truly designed to take the abuse at busy stand alone driving ranges. Built to last with thick galvanized steel, our HD pickers stand up to wear from heavy use and mother nature. Our pickers have the highest capacities available in the market today.

- Fully galvanised high grade steel
- In-line design allows for backing
- High capacities – 2 400, 4 000, 5 600 balls
- Greasable pillow block bearings and caster fittings
- Floatation tires for smooth stable ride
- Adaptable to any cart or vehicle
- Multiple flex points for varied terrain

Each gang has two 400 ball baskets for maximum picking capacity. Its straight beam design provides the cleanest sweep in the industry during both straight runs and turns.

IT'S IN THE DISC!

RS Multiflex discs are made of highly resilient soft plastic. The unique "multiflex" discs are both flexible and durable and can absorb daily punishment while picking golf balls under even the most extreme conditions. They are UV protected for maximum wear.

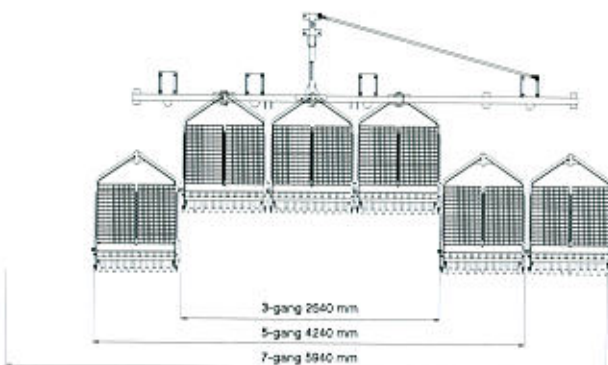

Multiflex discs

310 005	MIDI	3 gang	6 baskets	2 400 capacity
310 015	MAXI	5 gang	10 baskets	4 000 capacity
310 025	JUMBO	7 gang	14 baskets	5 600 capacity

Rubber discs

300 000	MIDI	3 gang	6 baskets	2 400 capacity
300 010	MAXI	5 gang	10 baskets	4 000 capacity

Picker disc Multiflex

Maxi Multiflex HD

Modular in design, the picker can be upgraded to a larger model with a simple extension kit.

Ball Washer

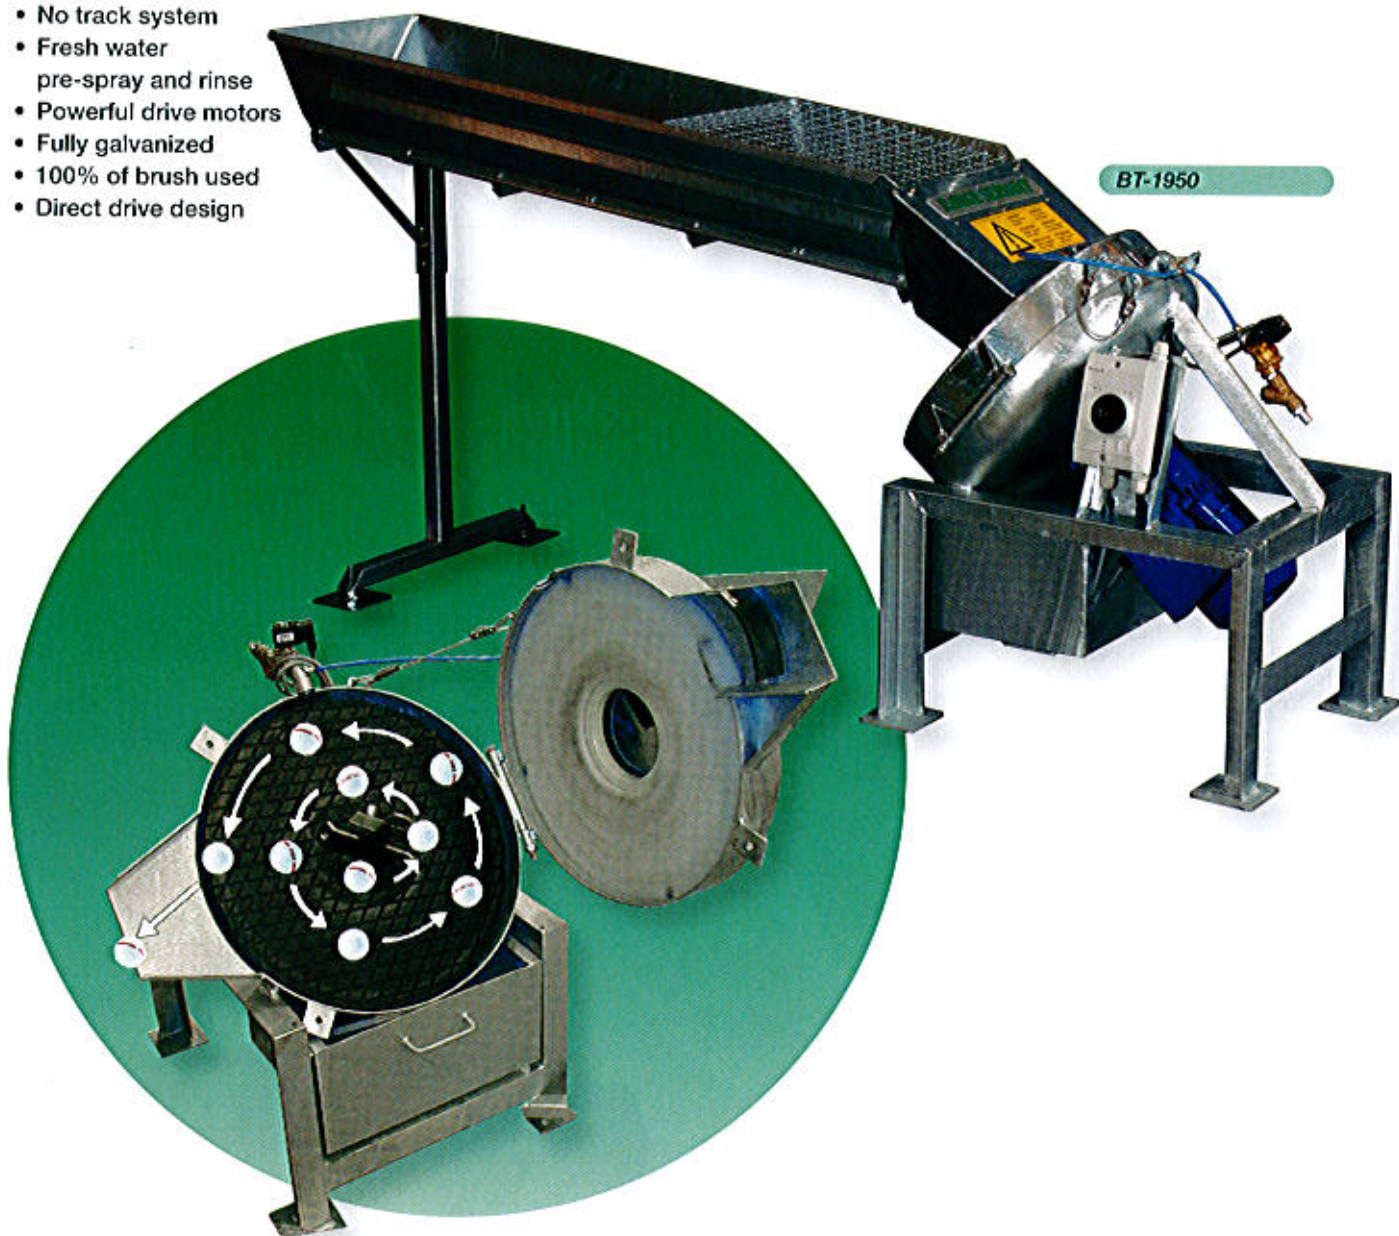

BT-1950

Range Servant Golf Ball Washers are known worldwide to be the most reliable washers on the market. Manufactured with hot-dip galvanizing iron base frame, the BT washer is equipped with a powerful drive motor and only one moving part. Without any failure-prone couplings and belts the yearly maintenance is reduced to one procedure, changing the brush. All Ball Washer models can be used by themselves (stand alone) or as part of a Ball Management System.

Range Servant BT Ball Washers take a ball-friendly approach by using fresh water pre-spray and concentrated jet-rinse to ensure clean range balls without the unnecessary use of detergents. The Range Servant BT Ball Washer comes with an 800 balls standard ball feed hopper.

If extra capacity is required a 3 000 capacity XL-Hopper is available which can hold a set of ball picker baskets.

- Jam proof!
- No track system
- Fresh water pre-spray and rinse
- Powerful drive motors
- Fully galvanized
- 100% of brush used
- Direct drive design

Elevator

Available in four standard lengths as well as custom-built, the RS Elevator is a workhorse. Carrying 30 000 balls every hour, the RS Elevator can be seen at the busiest ranges all over the world (see page 5 Ball Management Systems).

It is constructed of rust-proof aluminum and stainless steel. With no failure prone bearings or couplings maintenance is negligible. All standard elevators comes with an automatic overfill protection system.

- 500+ balls per minute
- Aluminum and stainless construction
- Direct Drive Motor
- Custom built on request
- Automatic Overfill Protection

Elevator with overfill protector

EGM 0001 Elevator 1.4 m (For RS Ultima 8)

410 000 Elevator 1.8 m (For RS 4/8/11 and flat hopper)

EHM 0001 Elevator 2.1 m (For all ball dispensers with cone top)

420 000 Elevator 2.3 m (For all hoppers with cone top)

RS Elevator

Pre-Soaker

The pre-soaker 3 600 is used for clearing sand and mud prior to washing the balls in the ball washer BT-1950.

- 3 600 Ball Capacity
- 18 000 balls/hour
- Has a brush system to compliment soaking action
- Fully galvanized

Ball Washer and Pre-Soaker

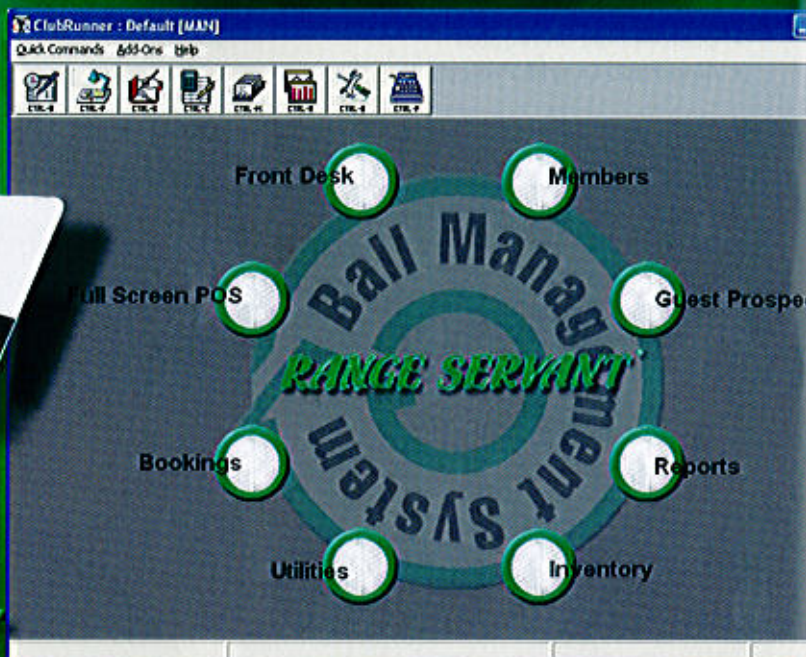

220 000	Ball Washer BT-1950	~ 24 000 balls/h
221 400	XL-Hopper	~ 3 000 balls
WFM 0000	Pre-Soaker 3600	~ 3 600 balls

PLAYGOLF MANCHESTER

"Range Servant has delivered a superb Epos and ball payment system, combining a really comprehensive and easy-to-use bookings application that both our shop and each of our pros can use. All of this is now aligned seamlessly with both the customer management system and the excellent Range Servant ball management system. We're now able to deliver a whole new level of customer service and relationship management.

Craig Whitfield, PlayGolf Manchester, UK

Range Servant Select

Use ONE system for the driving range, club house and restaurant!

The Range Servant Select system has evolved to a complete driving range and golf club management system as Range Servant and the Epos Company ClubRunner has joined forces to create Select Version 3. Select Version 3 gives you everything that you need to operate any clubhouse and driving range. Get it all with Select Version 3, use one card at the club house, driving range and at the restaurant. Through complete financial revenue and customer reporting from Select Version 3 you will increase your customer service level and at the same time it will give you more understanding and control of your sales and business trends. Give your customers the full service.

Select Version 3 Features:

Select Member system uses a standard magnetic card to identify the customer.

Customer can be assigned to various range plans such as juniors, seniors and pro-staff with unique pricing and happy hour periods.

The Pin Ticket feature replaces the use of token through PC generated receipt with a pin code. At the dispenser the customers enters the pin-code which dispenses the pre-requested balls.

The maintenance module notifies you as a range owner, when the machinery service is required.

The Select Version 3 system is available in the three standard packages:

Select Alone Range

The Select Alone Range package is for the small stand-alone driving range, which do not have a Pro shop. This package offers member card system with unlimited members and a pin tickets system.

Select Pro Shop

The Select Pro Shop package is for the driving ranges that has a Pro shop. This Package consists of a full screen point of sale with stock control, member card system with unlimited number of members, and a maintenance module where the system will send a message when maintenance is required.

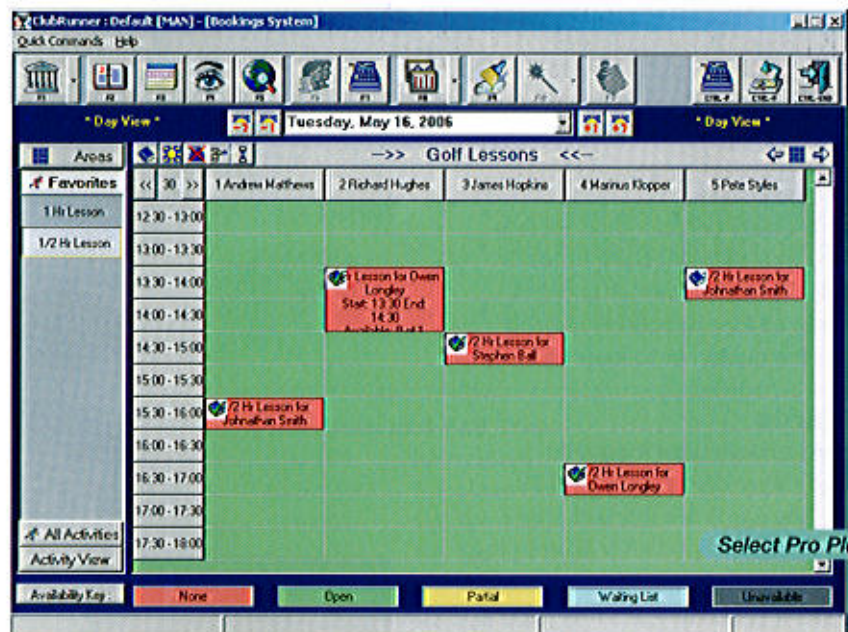

Select Pro Plus

The Select Pro Plus package is for the larger golf club or driving range. In addition of the features from the Pro shop and alone packages, a booking module is included for booking classes.

Additional modules are also available to extend to operations such as

- Access control: Opening up gates, doors.
- Restaurant modules: Integrate a table booking and running tabs.
- Card printing: Print and encoding of your member cards.
- Photo Imaging: For easier recognition of your customers.
- Internet booking

Please contact Range Servant for more information regarding the additional modules.

Range Servant Select Dispenser Kit

The Select Dispenser kit is an electronic package installed in your ball dispenser. The Select user friendly vending door panel allows for flexible choices for the paying customer. The Select Dispenser kit can be installed on all Range Servant dispensers.

The Select Dispenser kit offers:

- Three basket sizes through a choice of token, coin and bank notes
- Discount rates – the more the customer spends the more balls per credit they get. The Dispenser automatically recalculates the amount of balls dispensed based on the payment value.

- Happy hour – four happy hour periods on a daily or weekly basis, vary the price or the dispensing ball amount.
- Report – through an optional receipt printer you get the amount of token, coin bill notes received and the amount of balls dispensed.

Select

930 742	Stand Alone Range Package
930 743	Pro Shop Package
930 744	Pro Shop Plus Package
930 157	Select Dispenser Kit Ultima

Payment Systems

The Range Servant ball dispensers can be equipped with various types of payment systems:

Tokens

Range Servant has a large selection of mechanical and electronic tokens for use in mechanical or electronic token acceptors. The tokens are nickel-plated but also available in brass. Tokens are supplied in box of 500 tokens. All tokens are manufactured by Range Servant.

Coins

Up to six different coins can be used with the electronic coin acceptor. A simple mechanical coin acceptor is also available designed to accept one specific coin or token.

Bill Acceptors

A high reliability bill acceptor accepting up to four different bank notes is available. The bill acceptor accepts the bills in all four directions making easy for the customer to insert bills.

DigiCards

This card system uses magnetic encoded paper cards with up to 20 credits. The cards are marked after each use and scraped after all credits have been used. The cards can be customized with logos or other relevant information.

e-range

e-range is a highly reliable chip-based debit key system that offers up to three individual basket sizes. The e-range system comes with a reader for the ball dispenser and a computer reload software.

The e-keys come in a variety of colours.

Range Mats and Ball Tray

- Size WxH 840x800 mm
- Available in 25 increments from 50-300

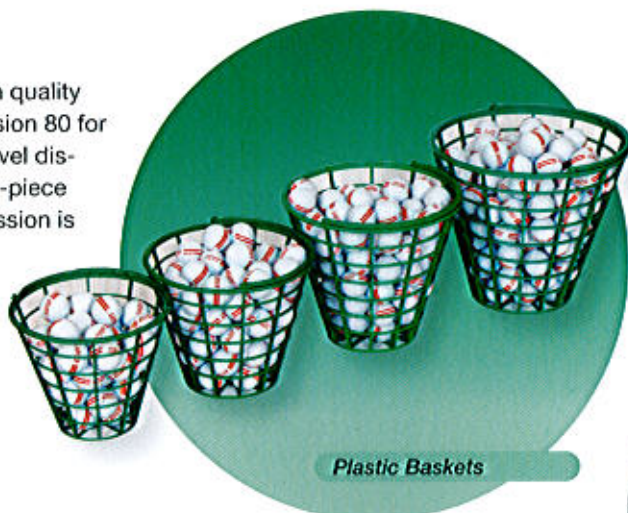

Range Balls & Baskets

Range Balls

Range Servant supplies high quality 1-piece ball with a compression 80 for the shorter ranges with a travel distance of about 225 m. Our 2-piece range ball with a 90 compression is for the longer ranges with a travel distance of around 250 m.

All balls can be customized with club logo or additional information in 1-4 colour print.

Plastic Baskets

Baskets

Range Servant offers both plastic and metal baskets in a variety of sizes. Our green plastic baskets are available in four sizes – 50, 75, 100 and 150 ball capacity – made from UV resistant polypropylene. The baskets are crack resistant and easy to manage.

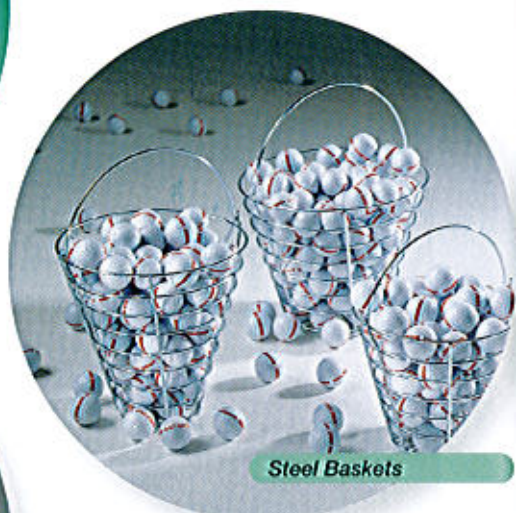

Available in three sizes – 50, 75, and 100 capacity – Range Servant's metal baskets are zinc galvanized to minimize corrosion. All Range Servant Baskets are designed for safe and easy stacking.

Basket Stand

Basket Stand

Range Servant's Basket Stands allow for safe and convenient stacking of up to 100 steel or plastic baskets. Stable and compact in design, our Basket Stand can be placed right next to the ball dispenser for easy self-service.
